

How will testing be coordinated?

Types:

By Scope → entire system

By Technique → path test, input-validation, logic-based testing, stress testing, load testing, etc.

By Source → source code, designs, specifications, etc.

Small	Large
Just functions	Everything

Intro to unit testing:

Test Plans

Test plans should define testing objectives

Test plans should address the following

- What to test?
- What techniques to use?
- How will the test cases be selected?
- When does testing start?
- When will it finish?

Test plans contents

Who will do the work?

How will the testing work be managed?
